Professional Summary

Front-end developer skilled in JavaScript (ES6+), React, Express.js, Node.js, and modern UI frameworks like Tailwind CSS and Bootstrap. Experienced in building responsive, mobile-first web applications and applying design thinking to create user-centric solutions, with familiarity in REST APIs, Git version control, and collaborative development workflows. Recent Computer Science graduate.

Professional Experience

Full-Stack JavaScript Bootcamp at Tuwaiq Academy   04/2025 – Present
Completed an intensive program in modern web development with a focus on: Riyadh, Saudi Arabia
- JavaScript, React, and Express.js for full-stack applications
- HTML, CSS, Tailwind, and Bootstrap for responsive UI design
- Applied design thinking to build user-centered web solutions

Business Developer at Elham   07/2024 – 01/2025
This experience taught me market analysis, business communication, and data management. My main activities and achievements are: Riyadh, Saudi Arabia
- Conducted market research to identify target clients.
- Analyzed client needs to align with our services and gathered feedback to enhance future offerings.
- Engaged in client meetings and negotiations to influence decision-making.

Projects

Link Up
A mobile application that connects university students within their college community.
- Allows students to discover and sign up for campus events.
- Supports peer-to-peer communication and encourages social engagement.
- Focused on building a user-friendly, interactive student experience.

WAEI
An eco-friendly digital platform for selling, repairing, and recycling used household items. Aligned with Saudi Vision 2030 sustainability goals, it addresses key environmental challenges related to waste from furniture and appliances.
- Designed to streamline item listings, service bookings, and communication between users and providers.
- Emphasizes user-friendly navigation and community engagement.
